

Claude Houle

Full-Stack Developer & Software Architect

claude.houle@gmail.com | Montreal, QC | choule99.github.io/me

PROFILE

Software developer with 23+ years of experience across backend systems, mobile platforms, and web applications. Proven ability to architect and deliver production software spanning the full stack — from Spring Boot backends and Angular frontends to native iOS and Android clients — with a focus on quality, mentorship, and continuous improvement.

KEY ACCOMPLISHMENTS

- Led a production iOS app serving 200,000+ DAU with 99.999% crash-free rate across a 450K-line Swift codebase
- Architected full-stack solutions at Spiria spanning Spring backends, Angular frontends, and native iOS — including CAE's aviation pilot training platform
- Integrated CI/CD pipeline improving build speeds by 50% and increasing deployments from 1/week to 4/day through full App Store automation
- Doubled test coverage (30% → 60%) over four years through disciplined, incremental growth alongside codebase modernization

TECHNICAL SKILLS

Languages Java, Swift, Kotlin, TypeScript, SQL, Python

Backend Spring Boot, Hibernate, Node.js, PostgreSQL, MySQL, Docker

Frontend Angular, SwiftUI, UIKit

Mobile iOS SDK, visionOS SDK, Android SDK, Combine

DevOps CI/CD Pipelines, GitHub Actions, Fastlane, Sentry, LaunchDarkly

Testing JUnit, Mockito, XCTest, Swift Testing, Jest

Practices REST API Design, MVVM, SOLID, Software Architecture, Claude Code

Additional Objective-C, JavaScript, Oracle, DB2

PROFESSIONAL EXPERIENCE

Poka Inc. Architect, Lead iOS, Lead VisionOS

Oct 2021 — Present

Connected worker platform with 200,000+ DAU helping manufacturers improve productivity and knowledge sharing on the factory floor.

- Inherited a fragile 450K-line codebase with frequent crashes; introduced internal tools, reusable libraries, and standardized practices that raised the crash-free rate to 99.999%
- Faced slow, manual releases; built a CI/CD pipeline on MacStadium that improved build speeds by 50% and increased deployments from 1/week to 4/day
- Needed to scale the team fast; onboarded 20 Sri Lankan developers with a custom training curriculum, making them productive within 3 months
- Tackled low test coverage (30%); drove incremental testing alongside refactors, reaching 60% coverage over four years
- Adopted AI-assisted tools (Claude) into the iOS team workflow, reducing coding time by 10%

Appcom <i>Lead Mobile Developer</i>	Nov 2019 – Oct 2021
Mobile development studio developing and maintaining applications for clients across retail, healthcare, media, and mobility.	
<ul style="list-style-type: none"> - Managed 15+ concurrent client projects with duplicated effort across teams; designed a shared iOS framework of documented, unit-tested components that reduced duplication and improved time-to-market - Led the iOS team through full project lifecycles — planning, development, code review, and release — for Metro & Moi, Super C, FoodBasics, AbbVie, Le Devoir, Biodome de Montreal, Christies, TaxiCoop, and others 	
<hr/>	
Spiria Digital <i>Software Architect, Senior Developer</i>	Nov 2013 – Nov 2019
Custom software agency — led solution architecture across multi-platform client engagements.	
<ul style="list-style-type: none"> - Owned solution architecture for client engagements; translated business requirements into API contracts, data models, and integration strategies that guided development teams - CAE PreStudy: designed end-to-end architecture spanning Spring backend, Angular frontend, and native iOS for an aviation pilot training platform - Acosta SLTouch: built a hybrid mobile app and framework for retail analytics using BackboneJS/MarionetteJS and Node.js - Skillable: delivered a Progressive Web App for micro-learning using Angular and TypeScript 	
<hr/>	
8D Technologies <i>Back-End Java Developer → iOS Developer</i>	Oct 2009 – Oct 2013
Software and hardware for bike-sharing and automated parking systems, including solar-powered POS stations and backend platforms.	
<ul style="list-style-type: none"> - Started on the backend Java team for the Solstice bike-sharing suite; transitioned to iOS, bringing backend expertise that bridged system layers - Developed the Spotcycle and Solstice iOS apps, supporting city-wide deployments in London and New York City - Pioneered the first-ever Augmented Reality bike-sharing finder by combining live camera feed with Core Location data 	
<hr/>	
Accovia <i>Back-End Java Developer</i>	Oct 2007 – Oct 2009
<ul style="list-style-type: none"> - Architecture Team member on Ibiza Project — rebuilt travel platform with Java/Spring/Hibernate after critical client recovery 	
<hr/>	
Compuware Montreal <i>Java Consultant — Morgan Stanley</i>	Oct 2005 – Oct 2007
<ul style="list-style-type: none"> - Migrated legacy mainframe systems to Java services on the Libra project; globally distributed team (NY, Budapest, Tokyo, Vancouver) 	
<hr/>	
Mediagrif <i>Java Developer</i>	May 2003 – Oct 2005
<ul style="list-style-type: none"> - Built core services and reusable components on the Software Infrastructure team for e-commerce products 	
<hr/>	
EDUCATION	
Computer Science Technology <i>Cégep Édouard-Montpetit, Longueuil, QC</i>	2003
Three-year practice-oriented diploma covering C, C++, Java, SQL, Linux, and applied computing.	
Capstone project: <i>End-to-end development of an e-commerce website for an SMB.</i>
